Thunder Client

The screenshot displays the Thunder Client interface within a code editor. The left sidebar shows a file explorer for a project named 'ANALITICA-DE-DATOS', with a tree view including folders like 'static' and 'Vid', and files like 'V(1).mp4' through 'V(9).mp4'. The main workspace is divided into three panes. The top pane shows a REST client configuration with a GET request to 'http://127.0.0.1:8000/static/Otr..'. The middle pane shows the 'Query Parameters' tab, which is currently empty. The right pane shows the 'Response' tab, which displays a message: 'The response is more than 2MB, display not supported'. Below this message are links for 'Save File' and 'Open in Code'. The bottom pane is a terminal window showing the output of a command, including information about the Unicorn server running on 'http://127.0.0.1:8000' and the status of various GET requests to '/Docs/D%2810%29.pdf'.

The screenshot shows a web browser window with a REST client interface. The top bar displays the status: **Status: 200 OK**, **Size: 77.54 KB**, and **Time: 30 ms**. Below this, there are tabs for **Response**, **Headers 7**, **Cookies**, **Results**, and **Docs**. The **Response** tab is active, showing a JSON array of objects. The first object is expanded, revealing a **data** property with a nested array of objects. The second object in this nested array is selected, showing its details in a right-hand pane. This pane includes a **Choose a Data Source** section with a **Select the source from which to copy data.** instruction. Below this, the **Data source:** is set to **Microsoft Excel**. The **Excel connection settings** section shows the **Excel file path:** as **C:\Users\Vicen\OneDrive\Documentos\6to semestre\Administracion de Bases de D** and the **Excel version:** as **Microsoft Excel 2007**. A checkbox labeled **First row has column names** is checked. At the bottom of the browser window, a terminal-like area shows the command **>= uvicorn** followed by a plus sign, a minus sign, a square icon, a trash icon, and a three-dot menu icon.

Redocly

The screenshot displays the Redocly API documentation interface for the 'Laptopsclass' endpoint. The interface is divided into several sections:

- Left Sidebar:** A list of endpoints for 'Laptopsclass' with HTTP methods: GET, PUT, POST, DEL, GET, PUT, POST, DEL, GET, PUT, POST, DEL, GET, PUT, POST.
- Path Parameters:** A section showing 'id' as a required integer parameter.
- Responses:** A section showing two response codes: '202 Successful Response' and '422 Validation Error'.
- Response Samples:** A section showing the content type 'application/json' and the response body 'null'.
- Endpoint Details:** A section showing the endpoint path '/Dell/' and the response code '202'.
- Endpoint Description:** A section showing the response '202 Se devolvio la lista de laptops correctamente'.

The interface is dark-themed and includes a search bar at the top left. The URL bar shows '127.0.0.1:8000/redoc#operation/laptopsclass_Lenovo_id_delete'.
